- The shelf that it is under the basin is made of MDF lacquered with the same 18 resin colours.
- Anti scratch material : AIDIMA certificate UNE EN 14688:2016

Maintenance

ES

Mantenimiento y limpieza

EPSILON se pueden limpiar con casi todos los productos de limpieza corrientes.

Es recomendado utilizar una esponja y agua jabonosa para la limpieza del plato de ducha. Jamás utilizar esponja abrasiva. Por favor, trasládese al cuadro más abajo si utilizarse productos diferentes.

IMPORTANTE: Si deben desatascar el sifón o los tubos de evacuación, es muy importante tener cuidado de no volcar sobre la los productos que contiene ácido sulfúrico o sosa cáustica. Es recomendado utilizar un embudo para echar este tipo de producto directamente en el sifón. Estos productos podrían dañar de manera irreversible la superficie.

EN

Cleaning work and maintenance

EPSILON can be cleaned with almost any product suitable for cleaning.

We recommend cleaning with soap and water with a soft cloth or damp sponge, never with pads.

Please pass to the follow list if you use different products referred in this.

IMPORTANT: Do not use the product of cleaning pipes on the surface of the plate are to be used. (often contain caustic soda or sulfuric acid). If such products directly applied with a funnel on the valve without contact the basin. Therefore cause significant damage on the exterior paint.

FR

Entretien et nettoyage

EPSILON peuvent être nettoyés avec quasiment tous les produits d'entretien courants.

Il est recommandé d'utiliser une éponge et de l'eau savonneuse pour le nettoyage. Ne jamais utiliser d'éponge abrasive.

Veillez vous reporter au tableau ci-dessous si vous utiliser des produits différents.

IMPORTANT: si vous devez déboucher le siphon ou les tuyaux d'évacuation, il est très important de faire attention à ne pas verser sur le plan vasque des produits contenant de l'acide sulfurique ou de la soude caustique. Il est recommandé d'utiliser un entonnoir pour verser ce type de produit directement dans la bonde. Ces produits pourraient endommager de manière irréversible la surface.
