

- Coycama thanks you for having placed your trust in us by purchasing this piece of furniture.
- This manual has been prepared with the aim of ensuring the user's safety and the correct use and maintenance of the bathroom furniture. Please read it carefully before use and cleaning.
- The furniture strictly complies with all applicable European directives and standards.
- To assemble the parts that are supplied separately, carefully follow the manual.
- Expansion screws are supplied for fastening the furniture to walls.
- The user is responsible for having the material required for cleaning the furniture.

This manual must be stored in a safe place and must be available for consultation.

The stability and capacity of Coycama products are guaranteed exclusively in compliance with these instructions.

Coycama products are designed exclusively for indoor spaces. Do not use this furniture outdoors. The bathroom furniture must not be used for purposes other than those intended.

Avoid dragging, striking, sitting on or climbing on the furniture, shelves or drawers. Do not hang from doors or drawers. If you need to move it, please lift it up.

No arrastrar los objetos depositados sobre las superficies, levantarlos.

Do not drag objects on floors, lift them.

Be careful with glass or mirror components. Do not open different doors or drawers at the same time.

The furniture must not be exposed to direct sunlight, since over time it will present variations or opacities in the colour tone.

Do not expose wooden furniture to extreme temperatures or humidity changes by placing it near radiators, air conditioning outlets or humidifiers.

Do not place the furniture near a heat source higher than 45°C as excessive heat can cause bulging, detachment, warping or opacity.

Always place protection between the surface and any electrical appliances such as a hair dryer, iron, etc.

Avoid exposing furniture parts to excessive contact with water. After each use, remember to dry any water residue.

Cleaning and maintenance: It is advisable to clean the furniture with neutral detergents dissolved in 50% water and dry immediately with a soft cloth. Do not use alcohol-based or solvent-based products or products that may contain abrasive substances (acetone, ammonia, trieline, chlorine, caustic soda, muriatic acid, thinner, industrial alcohol, etc.) or store this type of material inside the furniture.

The individual characteristics and natural variations of the wood make each piece of wooden furniture a unique piece. Follow the advice described to ensure that your products are preserved for many years in the condition they were in on the first day.

Coycama uses top quality materials to make its wooden furniture. However, as they are natural products that are sensitive to excessive thermal shock (cold, heat, humidity) they may vary slightly in size or stresses may appear as cracks over time.

End of life cycle: Coycama makes every effort to ensure that the products it offers have a long service life and after-sales service is provided so that service life can be extended by supplying spare parts.

Easily identifiable and recyclable components are carefully chosen.

The components of Coycama's products can be separated (aluminium, steel, plastic, wood, etc.) to ensure correct recycling through authorised waste management firms or by delivering them to a Clean Point available in most cities and towns.

The guarantee does not cover misuse: This documentation is only indicative. If you have questions about how to assemble the furniture or clean it, please contact your point of sale. The company declines all liability arising from incorrect use of the product.
